

COUPLINGS - KWIKFIT - LIGHT HOSE CONNECTION

Specifications

Kwikfit type fittings are used to quickly couple machines to our range of WRE mining hoses from 10mm to 50mm.

Smaller sizes are made from mild steel whilst larger sizes are made from ductile iron.

Super-fast coupling method

Complies to SANS1086 pressure requirements

Interchangeability within each fitting group is a useful feature and provides a wide combination of pipe threads and hose sizes.

Backhead spuds are available for two of the fitting groups for use with hose tails ranging from 10mm (3/8") to 25mm (1").

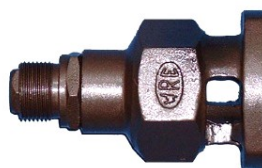

Female Spud

Male Spud
